KOLADE MALIK ISHOLA

ECONOMICS | QUANTITATIVE RESEARCH | DATA ANALYTICS | DATA SCIENCE

Lagos, Nigeria (UTC+1) • +234 901 017 5707 • theonlykolademalik@gmail.com • github.com/Nicholasmile

PROFESSIONAL SUMMARY

Economics graduate and quantitative research professional with 2+ years of experience in data sourcing, cleaning, validation, statistical and econometric analysis, and research reporting. Hands-on with Python, Pandas, NumPy, SQL, STATA, EViews, R and Excel, with growing machine-learning experience using scikit-learn. Worked across macroeconomic, development, healthcare and household datasets, and skilled at translating quantitative evidence into clear findings and recommendations. Interested in data analytics, data science and research roles where rigorous analysis supports practical decision-making.

CORE SKILLS

Programming & Data: Python, Pandas, NumPy, SQL/MySQL, Excel, Jupyter, Git/GitHub

Analytics & Modelling: STATA, EViews, scikit-learn, exploratory data analysis, statistical modelling, econometrics, classification, model evaluation

Data Workflows: Data sourcing, cleaning, transformation, validation, feature preparation, variable construction, reproducible analysis

Research: Literature review, research design, evidence synthesis, source evaluation, quantitative interpretation, research reporting

PROFESSIONAL EXPERIENCE

INDEPENDENT QUANTITATIVE RESEARCH & ECONOMETRIC ANALYSIS — 2025–Present

- Support end-to-end quantitative research assignments covering literature review, data sourcing, preparation, validation, econometric/statistical analysis, interpretation and reporting.
- Work with macroeconomic, development, healthcare and household datasets, restructuring raw data into analysis-ready formats and checking consistency before modelling.
- Apply appropriate econometric and statistical techniques to research questions, assess model diagnostics and interpret results with attention to limitations and policy relevance.
- Translate technical outputs into clear findings, recommendations and research narratives for non-technical audiences while delivering work independently to deadline.

UNIVERSITY RESEARCH & ACADEMIC MENTORSHIP — 2021–2025

Lagos State University

- Contributed to 25 undergraduate research projects across literature review, research design, data collection, quantitative analysis, interpretation and evidence-based recommendations.
- Mentored students in research methodology, econometrics, quantitative analysis and academic writing, helping them move from research questions to defensible empirical results.
- Represented 170+ students at departmental level and contributed to academic committees, strengthening stakeholder communication, coordination and leadership.

SALES & RECORDS ASSISTANT — Seasonal | 2021–2026

ALFA STORE

- Maintained records of beverage sales, customer collections, returned goods, quantities and costs to support accurate daily reconciliation and inventory tracking.
- Built a spreadsheet-based costing and reconciliation tool that reduced the time required for sales totals and product costing by approximately 80%.

ACADEMIC MENTOR & TUTOR — 2019–Present

Afkindemy

- Teach and mentor students in Mathematics, Economics and related subjects, adapting explanations to individual learning needs and examination goals.
- Provide structured academic guidance and study planning, strengthening communication, problem-solving and one-to-one support skills.

SELECTED DATA & RESEARCH PROJECTS

BANK MARKETING — CUSTOMER RESPONSE CLASSIFICATION

Python | Pandas | scikit-learn

- Prepared and analysed 41,176 customer records from the UCI Bank Marketing dataset, removing duplicates, engineering a prior-contact indicator, encoding categorical variables and standardising numerical features.
- Built and evaluated classification models using a stratified train/test workflow; Logistic Regression achieved 89.8% accuracy and ROC-AUC of 0.800, with additional evaluation using precision, recall and F1 score.
- Examined model coefficients and experimented with Random Forest settings to understand feature effects, class imbalance and generalisation trade-offs.

OUT-OF-POCKET HEALTHCARE EXPENDITURE & HOUSEHOLD WELFARE IN NIGERIA

Household Survey Data | Python | STATA

- Conducted an end-to-end quantitative research workflow covering literature review, research design, data sourcing, cleaning, variable construction, analysis and interpretation.
- Prepared household-level variables for empirical analysis and applied statistical/econometric techniques to examine the relationship between healthcare expenditure and household welfare.

GREEN FINANCE & TECHNOLOGICAL INNOVATION — ECOWAS PANEL STUDY

Panel Data | STATA | EViews

- Sourced, cleaned, restructured and validated multi-country economic data to construct an ECOWAS panel dataset for empirical analysis.
- Applied ARDL, DOLS, GMM, PMG and VECM approaches, conducted diagnostic assessment and translated results into evidence-based research conclusions.

PUBLIC DEBT & ECONOMIC GROWTH IN NIGERIA

Time-Series Data | EViews | ARDL

- Prepared Nigerian macroeconomic data, specified an ARDL model and used Bounds Testing to assess long-run relationships.
- Interpreted short-run and long-run estimates and translated econometric evidence into research conclusions and policy implications.

EDUCATION & PROFESSIONAL DEVELOPMENT

LAGOS STATE UNIVERSITY (LASU) — B.Sc. Economics **2021–2025 | CGPA: 4.35/5.00**

- Ranked among the Top 20 graduating students; relevant coursework included Econometrics, Mathematical Economics, Quantitative Methods, Macroeconomics and Microeconomics.

TS ACADEMY — Data Science Training **2026–Present**

- Developing practical skills in Python, Pandas, NumPy, machine learning, statistical modelling, data analysis and data pipelines through hands-on projects and structured coursework.

ADDITIONAL INFORMATION

Work Style: Remote-ready, independent and asynchronous work, collaborative research and analytical projects

Communication: Strong written and verbal English; comfortable explaining quantitative findings to non-specialist audiences
